8 Sept 1966

Dear Fred:

I remember Q Bldg and flying saucers well -- have used the latter to teach astronomy students since 1958, and helped organize the CBS TV show around the Robertson Panel conclusions plus more recent student interests.

The sociological aspects still intrigue me -- particularly the eastward drift of UFO activity around the world and the God-angel image transferred to the UFO crew. It's too bad that the USAF still is accused of "holding something back", and that this "Serious Business" book is a best seller.

Your letter set in Cambridge while I was in Argentina for 2 months (no UFO's there). I got involved in the revolution there, fixed up the 61-inch telescope, and now have only 1/2-drive at SAO. The other half is teaching at Yale. Next time I'm in Washington, I'll look you up.

Sincerely,

Thornton Page

(Written on a very rough
New Haven train!)
